ELECTRICITY & LIGHTING

EFFAPEL

EFFAPEL APOLO 5000

The APOLO 5000 Series stands out for its sober design and straight lines.

Its discreet presence confers a minimalist and distinguished touch to your decoration.

We recommend installing it throughout the house except in bathrooms and kitchens.

ELECTRICAL PANEL OF THE DWELLING

CEILING LIGHT SPOTS

They are installed throughout the interior of the house according to the electrical plan of the project.

Led light 2700k

VIDEO INTERCOM

Video intercom system for exterior door opening. Includes app for control from mobile phone or tablet.

OUTDOOR LIGHTING

CLIMATISATION

AIR CONDITIONING AND HEATING WITH AEROTHERMAL FAN COIL SYSTEM

is equipped with a modern climate control system based on aerothermal energy combined with high-efficiency fan coil units. This technology provides both heating and cooling throughout the year using a single, highly efficient installation. The system uses energy from the outside air to produce hot or chilled water, which is distributed to elegant wall-mounted fan coil units positioned close to the floor, ensuring optimal comfort and a discreet architectural integration.

FAST AND RESPONSIVE COMFORT

Fan coil systems react quickly, allowing the interior temperature to reach the desired level within minutes. Unlike slower systems, this provides immediate comfort and flexible climate control adapted to daily living.

HEALTHY INDOOR AIR QUALITY

Each fan coil unit includes air filtration that helps capture dust and airborne particles, contributing to a cleaner and healthier indoor environment. This improves overall air quality and enhances everyday comfort inside the home.

ENERGY-EFFICIENT TECHNOLOGY

Aerothermal systems extract renewable energy from the air, significantly reducing electricity consumption compared with conventional heating systems. The result is an environmentally responsible solution with lower operating costs.

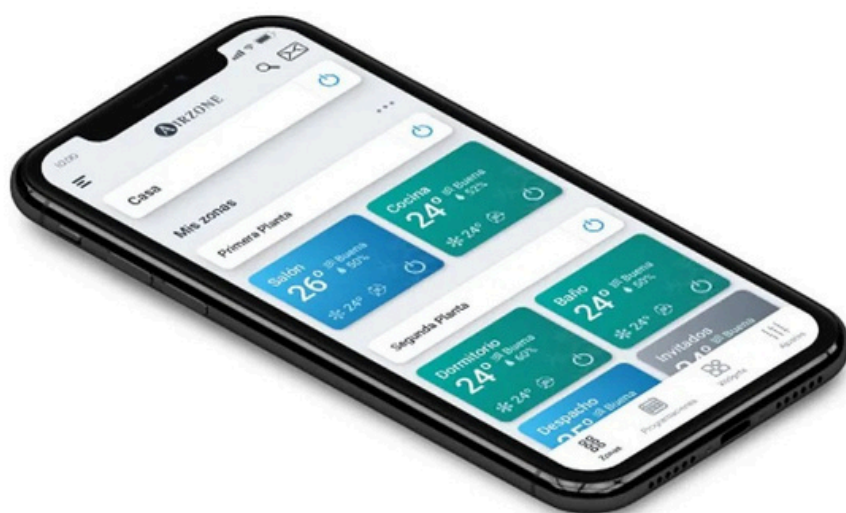

QUIET AND DISCREET DESIGN

The fan coil units installed in Oasis004 are designed to operate with very low noise levels while maintaining a sleek, discreet appearance. Mounted on the wall at floor level, they integrate naturally into the architecture without affecting the visual harmony of the space.

BIBLOC HEAT PUMP FOR ACS PRODUCTION - 500 ltrs

AIRZONE® THERMOSTATS

THE IDEAL TEMPERATURE FOR EACH ZONE

Airzone HVAC systems let you choose the desired temperature for each zone

The ultimate comfort experience while saving money and energy

CONTROL

Temperature control, operating mode and system speed.

HUMIDITY

Room temperature and relative humidity reading.

ECO-ADAPT

Maximize your saving thanks to our Eco-Adapt saving function.

MASTER

Control all zones from your master thermostat.

STAGES

Combine several heating sources to achieve the highest comfort.

WEATHER INFORMATION

Check what the weather is like in your location and adjust the temperature of your zones.

SWIMMING POOL & IRRIGATION SYSTEM

ASTRALPOOL Victoria Plus
1 x swimming pool filtration pump

SWIMMING POOL FILTRATION SYSTEM
ASTRALPOOL ICE D.750

RAIN BIRD IRRIGATION PROGRAMMER
- 3 zones
- motorised solenoid valves

Outdoor swimming pool shower:

SECURITY SYSTEM

Your family is safe with AJAX SYSTEM alarm

All this can be achieved by a remote control via the application.

It includes 6 indoor sensors + Keyboard

Possibility of extending areas (extra)

Possibility of installing security cameras (extra)
