

FACADES

- Preservation of the original façade. Replacement of the colour with the highest quality white exterior paint, in accordance with the standards of the area
- Laminated safety glass on terrace fronts
- Doors of the ground floor access to the garden, sides and clotheslines, in fire-lacquered steel

EXTERIOR CARPENTRY

- Minimalist carpentry in anthracite grey lacquered aluminium, with thermal break
- Solar control glass glazing with argon gas
- Automatic home automation blinds
- Natural stone sills

PARTITIONS AND FALSE CEILINGS

- Partitions by means of double laminated plasterboard and fixed by metal profiles
- Partition adapted in wet areas
- Thermal and acoustic insulation made of rock wool
- False ceiling of laminated plasterboard with curtains and darks with LED lighting

INTERIOR CARPENTRY

- Armoured doors with intelligent, domotic and lacquered security lock
- Interior doors in semi-solid white lacquered wood. Smooth with fixed top up to ceiling.
- Built-in modular wardrobes, with coated interiors and LED lighting at the door opening.

FLOORING AND CLADDING

- High-quality, large-format porcelain stoneware will be installed on the floor of the house and terrace, unifying outdoor and indoor spaces
- Smooth plastic paint throughout the house
- In the bathrooms, the wall tiles will combine porcelain identical to the floor and Italian large-format designer porcelain

TERRACES, SWIMMING POOLS AND JACUZZIS IN HOMES

- The ground floor will have a porcelain stoneware pool, at the same level as the ground.
- The penthouses will have a designer jacuzzi, accessible by lined masonry stairs
- The main terraces will have water outlets and a solarium
- Decorative plant planters
- Decorative direct and indirect lighting on terraces

KITCHENS

- The residential kitchens will have high and low modular furniture with lacquered doors. Adapted for the integration of appliances (including oven and microwave)
- Porcelain countertop and front, with integrated stainless steel sink, single-lever taps and induction hob
- Design island with extractor hood integrated into the ceiling

BATHROOMS AND PLUMBING

- Bathrooms with direct and indirect lighting
- Built-in design faucet, thermostatic in showers.
- Suspended toilets design
- Suspended sinks. In the master bedroom, double sink
- Large-format shower trays
- General cut-off valve in each home and independent cut-off in kitchen and bathroom with manifolds

- PVC sanitation with soundproof downpipes

AIR CONDITIONING AND HOT WATER

- Controlled mechanical ventilation for better air renewal and quality
- Air conditioning by ducted air conditioning with hot and cold pump, with exhaust grilles in all rooms and *automated "Airzone"* control
- Hot water by means of an electric water heater of sufficient capacity to provide DHW

ELECTRICITY, LIGHTING AND TELECOMMUNICATIONS

- The house will have direct and indirect lighting points
- Video intercom at the entrance to the communal property
- Provision of above-average electricity and telecommunications sockets. Telecommunications will be taken in living rooms, kitchens and at least two rooms per dwelling
- The garage will have pre-installation for electric vehicle charging, and electricity outlets

HOME AUTOMATION

- The entire house will have a local and remote home automation control system, by means of a local system integrated into the house and a remote system through an application
- Through this home automation system, it will be possible to control the lighting system, blinds, air conditioning, and smart lock

STAIRS

- Designer metal stairs in interiors (attics)
- Stairs with the same cladding on exteriors (low)

GARAGE

- All homes will have at least one garage space, in private communal parking in the basement, with road access by means of remote control.
- Quartz-polished concrete on garage flooring
- Direct access to elevators and portals

URBANIZATION AND COMMON AREAS

- Communal swimming pool with solarium
- Gym and changing rooms
- Children's play area
- Concierge access control to the property and perimeter video surveillance
- Non-slip porcelain flooring in common areas
- Energy-efficient direct and indirect lighting in common areas
- Access lifts from the basement, on all stairs (1 lift every 4-5 dwellings)
- Manicured vegetation. Towering illuminated palm trees

APPLIANCES (ONLY THOSE INCLUDED)

The determination of the premium brand will be subject to availability

The Miele logo is centered within a solid dark red square. The word "Miele" is written in a white, bold, serif typeface. The 'M' is particularly prominent, with a thick vertical stroke and a horizontal bar that extends to the left. The 'i' has a small dot, and the 'e' has a distinct tail. The overall logo is clean and professional, set against a contrasting background.
